

Release Liners for **INDUSTRIAL APPLICATIONS**

CUSTOMIZED RELEASE SOLUTIONS. Loparex develops tailor-made release liner solutions for a wide range of industrial applications. Our liners are an essential part of various industrial products and processes. Innovation, quality and service, as well as close co-operation with customers, are key components of Loparex's operations to best service the industrial sector.

Loparex's broad range of silicone coated release liners includes polycoated and direct coated papers and films. This enables us to provide suitable release liners for a large variety of industrial applications.

Composites are extensively used in aircraft construction, wind energy and recreational products. Whatever the application, Loparex has the necessary production technology and is able to propose cost-competitive solutions to meet the challenges of high-performance composite manufacturers.

Loparex has developed a unique in-line paper machine silicone coating technology, which enables us to produce high-quality, low-substance LOPASIL ESP liners for mailing envelopes and packing list envelopes. Our printing and slitting terminals guarantee reliable and quick deliveries in desired widths and prints.

The industrial sector comprises numerous demanding applications, and Loparex's wide selection of release liners offers solutions for every end-use, such as automotive industry, insulation, construction, roofing, fabric lamination and other special applications.

OUR TECHNICAL EXPERTS ARE AT YOUR DISPOSAL TO DEFINE THE RIGHT PRODUCT COMBINATION FOR YOUR NEEDS.

SILICONISED RELEASE LINERS FOR

- Composites
- Mailing envelopes
- Packing list envelopes
- Construction
- Roofing
- Waterproofing
- Insulation
- Automotive industry
- Fabric laminates
- Other special end-uses

CUSTOMIZED PRODUCT DEVELOPMENT

WIDE RANGE OF SUBSTRATES

CONSISTENT RELEASE

FROM NARROW COILS TO WIDE ROLLS

DIMENSIONAL STABILITY

TEMPERATURE RESISTANCE

Release Liners for INDUSTRIAL APPLICATIONS

Product group	Description	Product names	End-uses
Direct coated release papers	Direct coated kraft papers, clay-coated and glassines.	LOPASIL	Composites Mailing envelopes Packing list envelopes
Polycoated release papers	In-house extrusion coated and siliconised. Excellent stability, lay-flat and surface smoothness.	POLY SLIK	Construction Roofing Waterproofing Insulation
Direct coated release films	High and low density film based liners, offering excellent dimensional stability, smoothness and tear strength.	PRIMELINER	Automotive industry Fabric laminates Other special end-uses
